

KOS 14 & KOS 15 - chairs

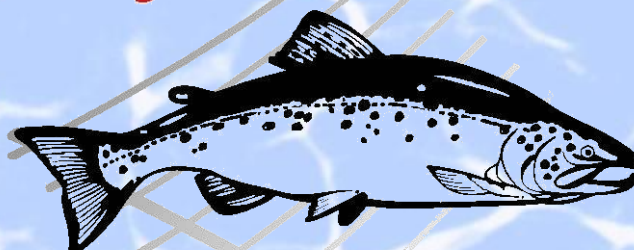

KOS 15

KOS 14

Kaj Olesen A/S

Both chairs have been developed to be resistant to the tough environment in the industry.

They are made of stainless steel and with a foam seat.

The chairs are manual adjustable in the height, and with a simple lock – this provides a prolonged lifetime and less maintenance of the chairs.

The chairs have 5 legs and is therefore very stable.

On the KOS15 there can be mounted a foot support.
